

Jorgensen Forge Outfall Site
First Modification for Administrative Order on Consent For Removal Action

This First Modification for the Administrative Order on Consent For Removal Action (Order) for the Jorgensen Forge Outfall Site (Site), CERCLA Docket No. 10-2011-0017, provides for the performance of the following additional Work by mutual agreement of the Parties in accordance with Section XXVII of the Order. Respondents shall perform a soil characterization to further characterize the lateral and vertical extent of soil containing elevated PCB concentrations in the vicinity of the deteriorated corrugated metal piping and surrounding soils at the western end of the two outfall pipes. Sampling and analysis during completion of the Order identified elevated subsurface soil PCB concentrations at two locations in this area. Further characterization is necessary to determine the extent of the elevated PCB concentrations and to identify and define necessary future response action to address the corrugated metal piping and surrounding soils. Such future response may require Amendment to the Action Memo for the Site and/or the Order or both, or a second Modification to the Order. All Work pursuant to this First Modification shall be performed in accordance with the terms and conditions of the Order.

1. Respondents shall submit a Work Plan for the First Modification, including a schedule for completion of the Work, within 30 days of execution of this Order.
2. Within 60 days of receipt of the final analytical data validation report for all samples collected as part of the EPA approved Work Plan, Respondents shall submit a Results Report describing the successful performance of activities described in the Work Plan.
3. Based on the findings of the Results Report, further actions to remove or otherwise address the corrugated metal piping and surrounding soils will be addressed as appropriate.

Timely, adequate submission of both the Work Plan and the Results Report shall be additional Compliance Milestones pursuant to Paragraph 47(b) of the Order. No further Financial Assurance pursuant to Section XXVI of the Order shall be required for this Work. Following EPA approval of the Completion Report, EPA will issue a Notice of Completion for the Work in accordance with Section XXVIII of the Order. This First Modification shall be effective on the date it is executed by EPA.
